OUR FOCUS

Discipline · Transparency · Results

Global Inspiration, Local Innovations

THE MISSION

The gap is execution.

Our beloved country, Bangladesh, is full of challenges. But we believe it is also full of the potential to solve them.

We don't need more ideas. We need disciplined systems that work. Systems that are transparent, reliable, and built to scale.

Our Philosophy | EST. 2022

Passion for Bangladesh
Solving real problems for our people.

Disciplined Method
Data-driven, proven, and scalable.

Usage of Technology
The most scalable way to improve.

Global inspiration. Local innovation.
Inspired by global technology. Engineered for Bangladesh.

Health

1 Smart Hub

Gateway and central control unit for seamless integration of smart home and community systems

7 Areas

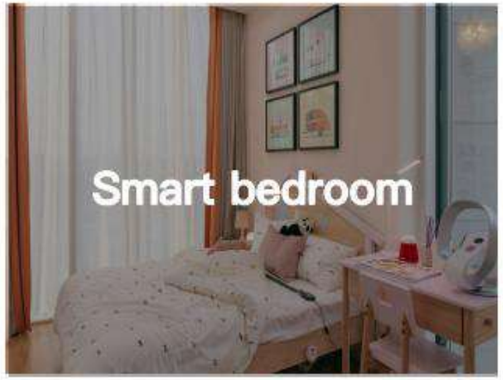
Comprehensive coverage enables smart linkage across your entire home

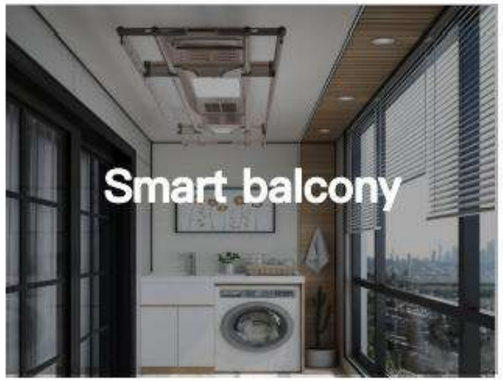
N Intelligent Subsystems

Ensures comfort, health, and convenience in community living

Standard Home Configuration

Smart Area-based Control





Smart Hallway

Smart central control unit | Security and sensor | Smart lock | Smart lighting

Scenes: Homecoming, departure, and lights on upon arrival

Products: Smart central control unit, smart lock, video doorbell, SOHUB protect, smart switch, Presence sensor

Description:

- You can unlock the door using fingerprint, code, or app, and smart devices and scenes are activated upon your entrance.
- The motion sensor automatically controls lighting. The SOHUB protect enables automatic security activation. The central control unit manages all smart devices.

Smart Living Room

Smart central control unit | Security and sensor | Smart sun shielding | Smart lighting

Scenes: Smart Lighting, AC Control, smart curtain

Products: Google nest hub, smart switch, smart light, IR remote or VRF AC controller, temperature sensor, door/window contact sensor, Presence sensor, Curtain motor

Description:

- You can create a comfortable and healthy leisure area at home through smart control, smart appliances, and smart lighting using voice command.

Smart Dining Room

Security and sensor

Smart sun shielding

Smart lighting

Scenes: Dining and tea party

Products: Curtain motor, door/window contact sensor, air quality monitor, smart switch, and thermostat

Description:

- You can create a comfortable dining environment through smart curtain and light control.

Smart Kitchen

Security and sensor

Smart sun shielding

Smart lighting

Scenes: Lights on upon arrival and linkage of water, electricity, and gas safety systems

Products: Smoke detector, gas detector, water detector, smart switch and smart socket

Description:

- Smart sensors provide instant alarm and mobile notification for gas or water leaks to ensure your safety.
- You can easily control kitchen appliances such as rice cookers by using smart sockets and switch you can remotely control them via the mobile app

Smart Bedroom

Smart central control unit | Security and sensor | Smart lighting | Door/Window sun shielding system

Scenes: Wake up, reading, family time, sleep aid, sleep, and nighttime convenience

Products: Google nest hub, curtain motor, door/window contact sensor, infrared intrusion detector, IR remote or VRF AC controller, temperature sensor and smart switch

Description:

- You can easily control lights, curtains, and other devices in the bedroom using voice command. The temperature control panel monitors indoor temperature and humidity in real time, providing a comfortable and convenient living experience.

Smart Bathroom

Security and sensor

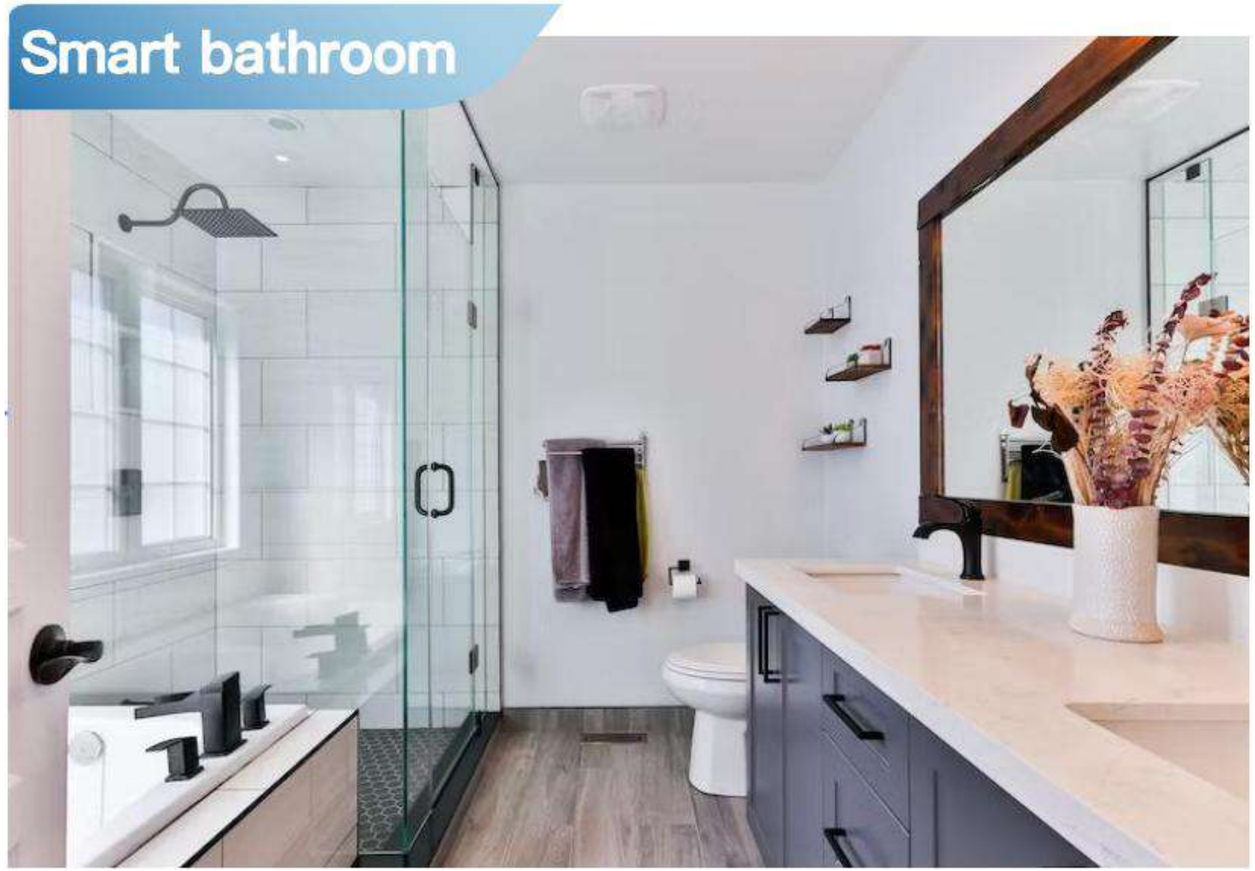
Smart lighting

Scenes: Personal care and lights on upon arrival

Products: Automatic faucet, Smart LED mirror infrared intrusion detector, , emergency button, and water detector and smart switch

Description:

- You can easily control lights, curtains, and other devices in the bedroom using voice command. The temperature control panel monitors indoor temperature and humidity in real time, providing a comfortable and convenient living experience.



Smart Balcony

Security and sensor

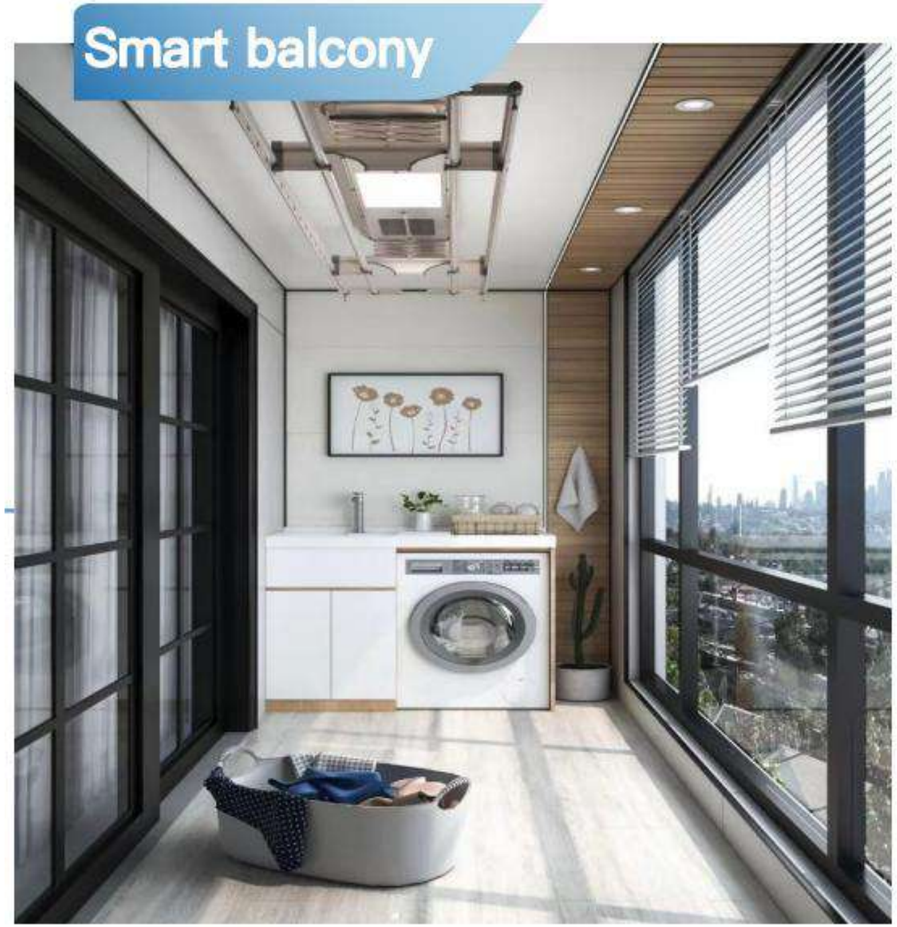
Smart lighting

Smart appliances

Door/Window sun shielding system

Scenes: Laundry drying, protection against inclement weather, leisure, and lights on upon arrival

Products: : Smart Switch, emergency button, water detector, door/window contact detector, and smart drying rack

Description:


- The windows automatically close, and the drying rack retracts the clothes during unfavorable weather conditions. The door/window contact sensor and water detector ensure real-time home security
